Solid Hardwood Floors

COSWICK HARDWOOD FLOORING

COSWICK Inspire

COSWICK LTD. is a international wood flooring company founded in 1995. The production is located in the Republic of Belarus, in the city of Zaslavl.

The main products of the company are three-layer single-strip floor boards, Chevron and Herringbone, mosaic flooring and parquetry, as well as sports floors for professional arenas and multi-purpose grounds.

INNOVATION

We apply all our many years of experience and knowledge, invest in new technologies and our own innovative know-hows to create reliable and durable floors that can be successfully used in a wide variety of facilities and in any climatic conditions.

QUALITY GUARANTEE

We adhere to high standards of product quality and safety, as well as confirm this in international certification systems. Quality is under control at all stages, from raw material selection to the finished floor.

HEALTHY ENVIRONMENT

For the production of parquet floors, we use certified environmentally friendly adhesives and protective coatings that do not emit substances harmful to human health. We regularly test products for compliance with European environmental safety requirements.

INTERNATIONAL RECOGNITION

Over 90% of our products are exported globally. Coswick dealer network spans over 50 countries on all continents.

ECOLOGY

We introduce technologies that guarantee the safety of production for the environment. In practice, we apply the principles of rational use of natural resources. We use controlled wood from forests where environmentally and socially responsible forestry is practiced.

COMPREHENSIVE SERVICE

We are always in touch with our clients. Any project is accompanied at all stages, provide expert and technical support before, during and after the installation of the floors.

- balanced and symmetrical construction
- increased stability
- extra-durable

BALANCED CONSTRUCTION

Balanced 3-layer construction of the floorboard remains stable even in the wider range of environmental humidity.

- All three layers are made of hardwood, top lamella is made of oak and American walnut, middle core is made of birch, the base lamella is made of oak or birch.
- Using birch as a core instead of softer pine species increases the stability of the board as birch is far more resistant to deforming.
- Upper and base lamellas have the same thickness, which allows them to affect the core symmetrically in case of changes in the environment. This increases the balance of the construction and practically eliminates the possibility of twisting.

CORK COMPENSATORS

Usage of cork compensators in the core layer provides additional stability and balance in case of variations in the environmental humidity.

EXTRA-DURABLE POLYURETHANE GLUE

Coswick uses a special polyurethane hot-melt adhesive for bonding of its 3-layer engineered flooring planks. It is durable, moisture-resistant and highly elastic.

When compared to other types of adhesives it has several advantages:

- There is no delaminating of the board at the seams even in case of flooding.
- No "ageing" effect: bonding qualities are retained over the entire life of the floorboards.
- Environmentally friendly formulation: no formaldehydes or other harmful chemical compounds.

STRUCTURAL WARRANTY!

COSWICK design solution

- **over 72** unique décors
in 3 protective finishes

Our décor collection combines natural tones and a variety of textures to highlight the individuality of each project. Focus on the details by selecting materials that perfectly complement the concept and style of your interior.

- **extended mosaic range:** chevron and herringbone, parquetry and mosaic flooring

The variety of Coswick décors allows to create any decorative compositions - from fancy palace patterns and classic designs to striking solutions in country, loft or high-tech styles.

- perfect solutions for high-end public spaces **in any climate zone**

COSWICK eco-friendly

ENVIRONMENTAL SAFETY DECLARATION

Coswick pays close attention to creating environmentally safe products and rational use of natural resources, reaffirming this dedication with regular examinations and internationally recognized certification.

NATURAL TIMBER, ENVIRONMENTALLY SAFE MATERIALS

All Coswick products are made of natural timber. Additional materials used during manufacturing are chosen in compliance with rigorous environmental requirements. Finished products are regularly tested for formaldehyde. As for this parameter, Coswick floorboards comply with the highest safety classes in use in the EU (E1) and the USA (NAUF, ULEF). This means that the emission levels of volatile compounds do not exceed that of the emissions of the natural timber.

RESPONSIBLE FOREST USE

We only use controlled timber. We acquire it from forests with ecologically and socially responsible management practices. Raw materials for floorboard manufacture are felled during forest sanitation activities thus not leading to deforestation.

WASTELESS PRODUCTION

Sawdust and trims from the manufacturing process are used as fuel for our furnace and in the production of fuel briquettes. This way our valuable raw materials are used rationally while simultaneously heating our premises without polluting atmospheric emissions.

COSWICK calendar 2025

NEW YEAR – NEW PATTERNS

COSWICK mosaic flooring is like dance, it allows to create a lot of dynamic installation patterns. Just like dance, hardwood flooring patterns can be distinctive and unique. The COSWICK calendar demonstrates many attractive installation patterns that can be created using standard geometric shapes – trapezoids, parallelograms, rhombuses and pentagons.

The patterns can be considered as a source of inspiration for hardwood flooring lovers and designers. Mosaic flooring allows to create an accent in the interior, introduce a volumetric and functional element into the space, fill it with natural beauty and rhythm. The possibilities of mosaic are almost unlimited. The calendar shows only a small part of the options. Each pattern contains a QR code, which makes the pattern come to life, allowing to enjoy dancing against the background of hardwood flooring. For more than 30 years, the COSWICK concept has been to follow the beauty of natural wood, the beauty of nature in all its forms, as well as the convenience and durability of our hardwood flooring.

**Alyes and Veronika Fomenko,
Designers:**

“Greatest luck for any designer is to find customers who are open to suggestions and experimentation as well as discussions on their lifestyle and preferences. Thanks to this we were able to come up with a tailored and cosy design for comfortable living. This project has many things to be proud of: the black cube of the shower room, a complex TV support system, other technical and artistic solutions. We think the idea of using built-in furniture as it allowed to free up about 30-40% of the wall space and use every inch of interior for family activities.

**COSWICK
project**

**“BLACK SQUARE”
DESIGN**

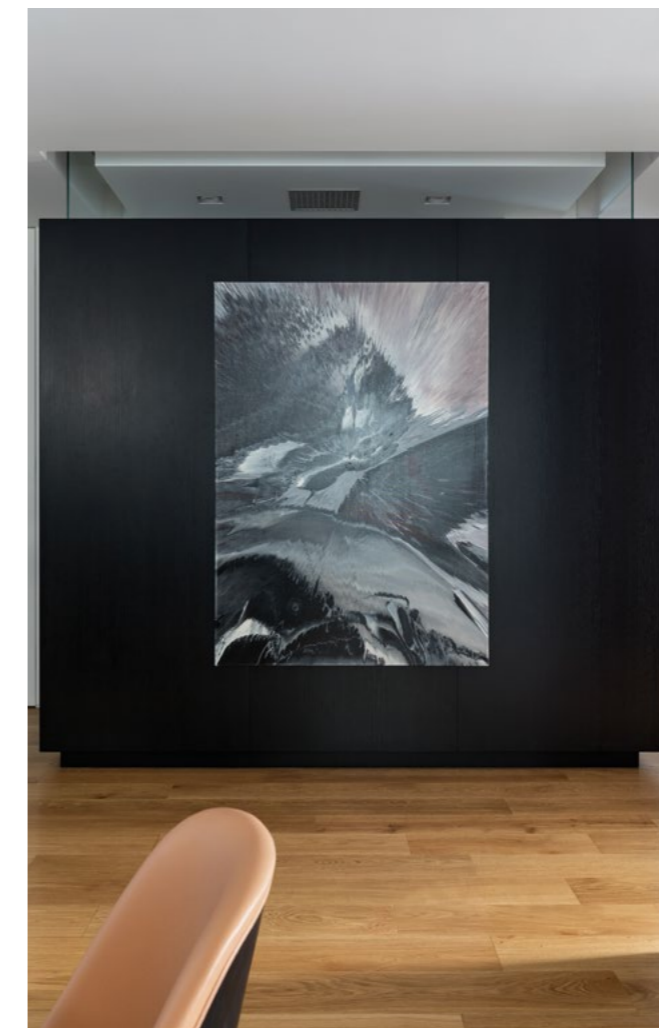

Design for an apartment in the new housing complex “Slavyansky Kvartal” in the center of Minsk for a modern family with two teenage sons. The clients wished for a comfortable space with a cosy living room combined with a kitchen, separate bedroom for kids, master bedroom, a study and a cloak room. As the clients take great interest in contemporary Belarusian art it was paramount to have a functional design without overindulging décor that has space for a family collection of paintings and sculptures.

The apartment is situated on the 13th floor and has a picturesque panoramic view of the city park and Svisloch river. To use this advantage to its fullest and give the owners a way of enjoying this splendor the living room/kitchen was joined with the balcony, removing window sills that were in the way and making the whole space bigger. Kids’ bedroom also has a panoramic window. Second balcony was made into a study.

To create a neutral back drop for art objects and furniture, a monochrome palette was chosen: warm grey, white and black. Based on the clients’ tastes, natural materials were used in décor. To create a cosy and warm atmosphere natural oak planks were used for floorings. Finished with silk oil, it is extremely pleasant to touch. Same boards were used as wall paneling above the bedhead. Veneered oak panels and oak furniture was used in other rooms as well. Kitchen and bathrooms were laid with stone-like ceramics.

A bold and technical solution was used in the making of the shower. Walls were separated from the ceiling by glass and the veneered black construction set near the living room looks light. This black wall of the shower room looks somewhat like Malevich’s “Black Square”, hence the project’s name that highlights the connection the clients have with the world of arts.

Coswick **Natural oak** 3-layer hardwood flooring was used in the project.

COSWICK project

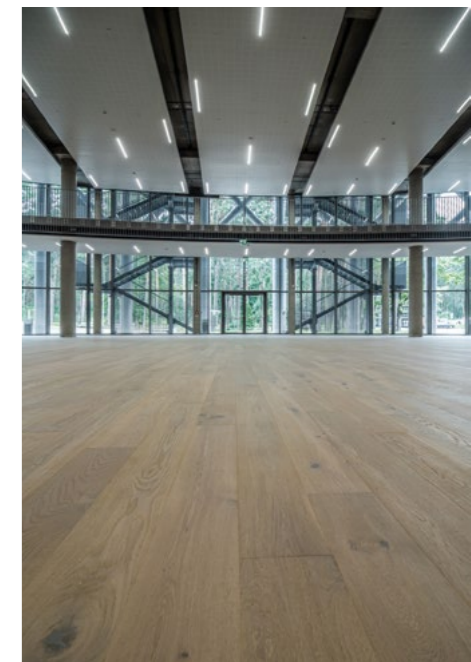

RIGA'S MEŽAPARKS GREAT BANDSTAND

In the beginning of September 2021 after a massive reconstruction the Great Bandstand in Mežaparks had finally opened. It is the biggest venue in Latvia situated in Riga city park. Originally it was built in 1955 to conduct traditional Latvian Song Festival and other big events.

The reconstruction, started in 2017 was the most significant cultural building project in Latvia. Unique architectural and acoustic solutions were deployed and some of these have no counterparts not just in Europe but in the world. This new ultra-modern venue has area of more than 146 thousand sqm. More than 10 thousand performers can be gathered on the stage. The renovated Great Bandstand has almost 30.6 thousand seats and can accommodate up to 70 thousand people.

Coswick had manufactured more than 2 thousand sqm of special high-durability oak planks for this project specifically. Such flooring retains its qualities and look even at high strain and moisture variation which is paramount for this kind of venue.

3-layer 21 mm Coswick planks finished with Reinforced Silk Finish was used for this project.

ESCADA

Coswick Chevron Oak Flooring in 1ST ESCADA CONCEPT STORE IN FLORIDA THE U.S. AT BAL HARBOUR SHOPS!

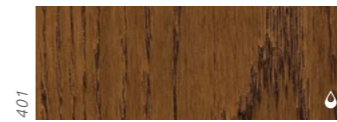

Escada's store elegant remodel. For the remodel Escada had installed traditional hardwood flooring in a chevron pattern, offering the space a unique interior design. As a brand beloved by big name celebrities, models and even royalty, it only made sense to create an extraordinary interior – Escada was looking for something bold and different for its new store remodel. The store knew exactly the type of flooring that would represent its brand message and correlate with its elegant interior design. The brand chose Coswick hardwood flooring in Chevron pattern to meet the demands of high traffic commercial interiors.

Product used: Chevron Flooring oak Vanilla

Ekaterina Trukhanova, Designer:

“My signature move is bold accent colours, daring but comfy solutions. My principle is that any desires of the customer, however unthinkable, can be included in the design and look stylish and appropriate. It’s a professional challenge. While it’s a very manly design, it has a lot of warmth and homely charm. I’m proud of my team’s work on this project.”

Design by Ekaterina Trukhanova, Head of Kate Hominess Design Bureau

COSWICK
project

GENTLEMAN'S APARTMENT

The owner of this apartment situated in a countryside apartment complex on the shores of the Minsk Sea is a successful young man who spends a lot of time at work and wanted to create a light and comfortable, truly homely space. Main points for the customer were a separate bedroom, lots of light and handy storage spaces.

Thanks to the free layout it was possible to create a big open space with panoramic windows that connects the entrance, kitchen, living room and relax zone. It also allowed for enough space for a separate bedroom and a balcony where one could easily organise a working space with a majestic view from massive window. this solution allowed to retain the feeling of freedom and air while also creating a cozy and functional private zone.

To note, the bedroom door was made into a stunning, perhaps even extravagant accent, as it was decorated in an English style loved by the customer. Stylistically it's supported by

mouldings and stuccos as well as Herringbone flooring. Hardwood flooring was essential for the customer as only real wood can give the feeling of naturalness, texture and warmth.

All in all, it's a stylish eclectic interior design where dashes of classic are balanced out by modern furniture and signature elements. And manly palette is softened by warm tones of the wood.

Coswick **Stoney Creek Oak** Herringbone flooring was used in the project.

Showroom Woodline

COSWICK project

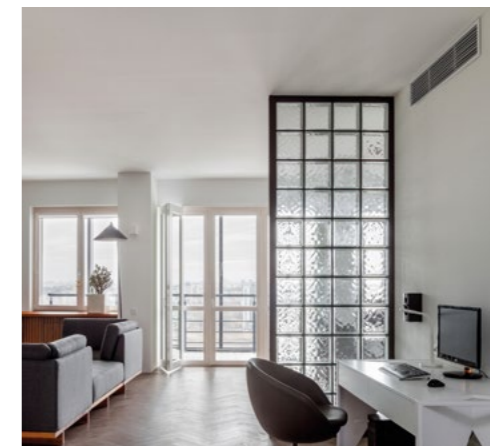

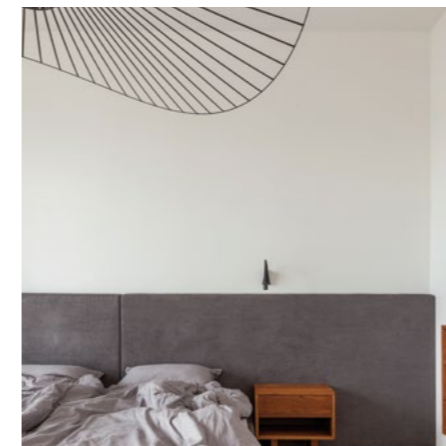

PRS APARTMENT. MONOCHROME INTERIOR "WITH STAIRS TO HEAVEN"

The layout of these apartments in Minsk is designed so that family members could comfortably spend time together and not disturb each other during the rest. The spacious living room, combined with a kitchen-dining room, is separated from the bedroom and a large children's hall with two dressing rooms.

The monochrome range of the interior, which is dominated by white, grey and accented black, is brightened up with natural wood details. Calm minimalistic wall decoration helps to focus on furniture created specially for this project. The unity of the furniture decoration gives a sense of space integrity. And a classic oak flooring in a soft velvety color "Grey Cashmere" adds coziness.

One of the interesting ideas of this project is "stairs" in the hallway. So the architects decorated a climbing frame inventing a backlit niche at the top. Now the owners of the apartments have a "stairway to the sky". Almost like Zakharov's Baron von Munchausen.

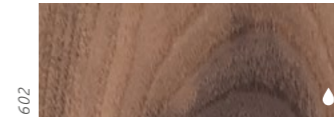

Coswick solid hardwood flooring Herringbone in color **Grey Cashmere** is used in the project.

Salon Parketa "Real Floors"

WALL PANNELLING AND A CONCEALED DOOR ARE CREATED USING CHEVRON FLOORING

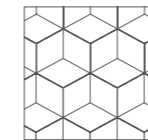

Wall panelling and a concealed door are created using chevron flooring. A prestigious ADD AWARD was presented for the project realized by a group of St-Petersburgh's architects.

Architectural and design studio, INT2 Architecture, received a prestigious ADD AWARD 2018 for an interior design of an apartment in a XIX century building in the

heart of St-Petersburgh. Coswick hardwood flooring was the floor of choice for this design masterpiece.

A truly harmonious living space full of light and warmth was created using the minimalist approach, working with colour and texture: deep tones of wall and ceiling paint, the play of wood texture, tiles, and ceramics.

COSWICK sport

Coswick sports floors are high-quality wood floorings for various purposes, from international tournament arenas to versatile sports grounds and fitness rooms.

All Coswick sports systems are designed in accordance with modern biometric standards and international requirements for professional sports arenas.

The precisely calculated functional characteristics of each structure create a comfortable playing surface for athletes, which ensures high efficiency of training and competitions at all levels, guarantees respect for joints and ligaments and minimizes the possibility of injury.

Coswick sports floors are manufactured with a factory protective and decorative coating and are ready to use immediately after installation. This guarantees an exceptional quality of the coating, reduces labor costs and time for floor installation.

Coswick Sports Floor
at an international squash
tournament Falcon Squash
Cup Open 2017

**COSWICK SPORTS
FLOOR RANGE INCLUDES FIVE TYPES
OF STRUCTURES DESIGNED FOR:**

- sports grounds for ball games - basketball, volleyball, handball, squash, mini-football, table tennis, badminton, etc.;
- universal gyms for physical education, training and competitions in all kinds of sports, including games;
- gyms and fitness rooms, aerobics, yoga, choreography studios etc.;
- temporary venues for sports dance competitions, fashion shows, presentations and other mass sports and entertainment events.

STANDARTS

Coswick sports floors meet the requirements of the comprehensive European standard EN 14904 and German DIN 18032-2. These standards set out the basic parameters that affect the performance and safety of sports surfaces.

COSWICK acoustic wall panels

ACOUSTICS

Coswick Acoustic panels are an element of walls and ceilings decoration. Its main purpose is to provide the highest degree of acoustic comfort in different rooms, absorbing and diffusing the acoustic energy.

AESTHETICS

Coswick Acoustic panels with the natural finewood veneer allow decorating rooms at the highest level of aesthetic perception. Standard design solutions offer 80 variants of decoration. However, custom solutions are available.

COSWICK moldings

STAIR NOSING

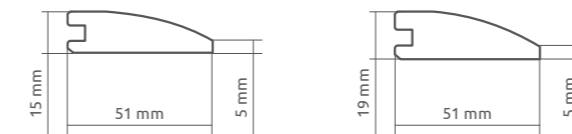

Stair nosing curves around the stair edge to decorate the transition of hardwood flooring into stairs. It can be used to decorate each stair element too. 130 x 19 mm stair nosing is meant to be used with 3-layer engineered T&G flooring 19mm thick and with thick solid hardwood flooring. 130 x 15 mm stair nosing goes with 3-layer engineered flooring 15 mm thick. Supplied length is 1400 mm.

Coswick stair nosings are manufactured from solid engineered oak or american walnut and come prefinished in all Coswick colors, styles and surface finishes to match flooring collections.

REDUCER

The purpose of a reducer is smooth out the transition between floors of different heights. 51 x 19 mm reducer is to be used with a solid hardwood flooring, 51 x 15 mm reducer goes with 3-layer engineered flooring and 51 x 2.7 mm reducer is to be used with 3-layer Coswick hardwood flooring.

CARPET REDUCER

Carpet reducer is designed to create a smooth transition from hardwood flooring to a thinner or more delicate type of floor covering, such as carpeting. Carpet reducers can compensate for slight difference in height between adjoining floors. 50 x 19 mm carpet reducer is to be use with a solid hardwood flooring, 50 x 15 mm carpet reducer goes with 3-layer engineered flooring.

BASEBOARD #11

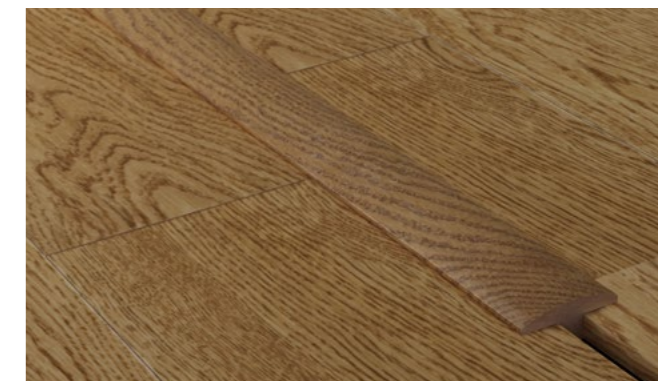

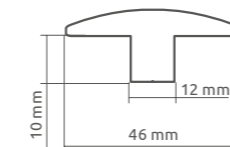

Coswick baseboard of extended height 120 x 20 mm. It is recommended for use in rooms with high ceiling and doorways. The baseboard length is 2100 mm.

T-MOLDING

T-moldings are used to finish the space between two areas of wood flooring, between flooring and tiles or carpet that are on the same level. The molding creates a smooth transition between adjacent floorings of the same height. Coswick 46 x 16 mm T-molding is a universal one and goes perfectly with solid, 3-layer Coswick hardwood floorings.

T-moldings are manufactured from oak, and are recommended for use in residential interiors. The length supplied is 2100 mm. T-moldings are available prefinished in all Coswick colors, styles and surface finishes to match the color between floors different in height or at the borders of different floorings.

COSWICK floor care products

Since 1995 Coswick has been creating premium quality hardwood floors of superb and long-lasting performance. The company gained wide manufacturing experience by operating a fully integrated production cycle from logs to readymade prefinished hardwood flooring and became recognized all over the world. We are glad to share our experience with experts and hardwood floors owners as a system of tested products for every stage of hardwood flooring use.

Coswick well-balanced formula and unique quality control system ensure highest quality of primers, adhesives, lacquers, cleaners, renovation and care products suitable for all types of hardwood floors and protective- decorative finishes.

Coswick is dedicated to production of well balanced, high performance, eco-friendly and easy to use products. We are working to make your hardwood flooring everlasting and bringing you joy and happiness.

COSWICK SERVICE KIT

Is designed to clean solid and engineered wood floors that have a lacquer or oil finish. The kit includes a microfiber mop cloth and ready-to-use Coswick Hardwood Cleaner.

Microfiber mop cloth:

- Very effective against dust;
- Highly absorbent and long service life;
- Suitable for machine wash.

Ready-to-use Hardwood Cleaner:

- Perfectly removes fat stains and dirt;
- Supplied for lacquered and oiled Coswick hardwood flooring;
- Non-abrasive, does not leave stains;
- Has a delicate aroma.

CLEANER FOR HARDWOOD FLOORS

Cleaner is designed for constant maintenance of hardwood flooring. Neutral pH ensures the minimal risk of color changes. Non-abrasive, does not leave stains. Has a delicate aroma. Contains 0.5 litres per bottle.

CLEANER CONCENTRATE FOR HARDWOOD FLOORS

Cleaner Concentrate is designed for preparing a Coswick Cleaner for constant maintenance of hardwood flooring. Dilute the cleaner concentrate in 1:50 ratio (i.e. 200 ml of concentrate per 10 l of water).

COSWICK RENEWER OIL FOR OILED AND HARDWAX-OILED HARDWOOD FLOORS

Renewer oil is developed for renovation of hardwood flooring with UV-oil, natural oils or modified alkyd oil finishes. High wear resistance, creates elastic protective film. Recommended for constant renewal and resurfacing of hardwood flooring. Does not require prior sanding.

COSWICK PROTECTIVE WAX FOR OILED AND HARDWAX-OILED HARDWOOD FLOORS

Product is developed for renovation of hardwood floors with natural oil, Hardwax or UV-oil finishes. Product creates an elastic, protective and water-repellent surface film.

TINTED OIL FOR RESTORATION OF OILED AND HARDWAX-OILED HARDWOOD FLOORS

Product is developed for renovation of hardwood floors with natural oil and Hardwax finishes. Product creates an elastic protective film on floor surface after applying.

COSWICK WOOD STAIN

Coswick stain is designed to tone wooden surfaces. Recommended to renovate small scratches, damages and end grains during the hardwood flooring lifetime exploitation. Suitable for stairs, moldings, wall panels and other.

COSWICK HEAVY DUTY CLEANER FOR HARDWOOD FLOORS

Product is designed to clean hardwood flooring with any type of finish. Recommended for removal of glue or spot residues after hardwood flooring installation. Use Heavy Duty Cleaner periodically during the hardwood flooring lifetime exploitation if any stain spots and contaminations which are hard-to-reach with cleaner for constant maintenance.

REPAIR KIT PROFI

Profi repair kit is a full set of tools designed to remove a minor flaws, scratches and dents that appear during the hardwood flooring lifetime exploitation.

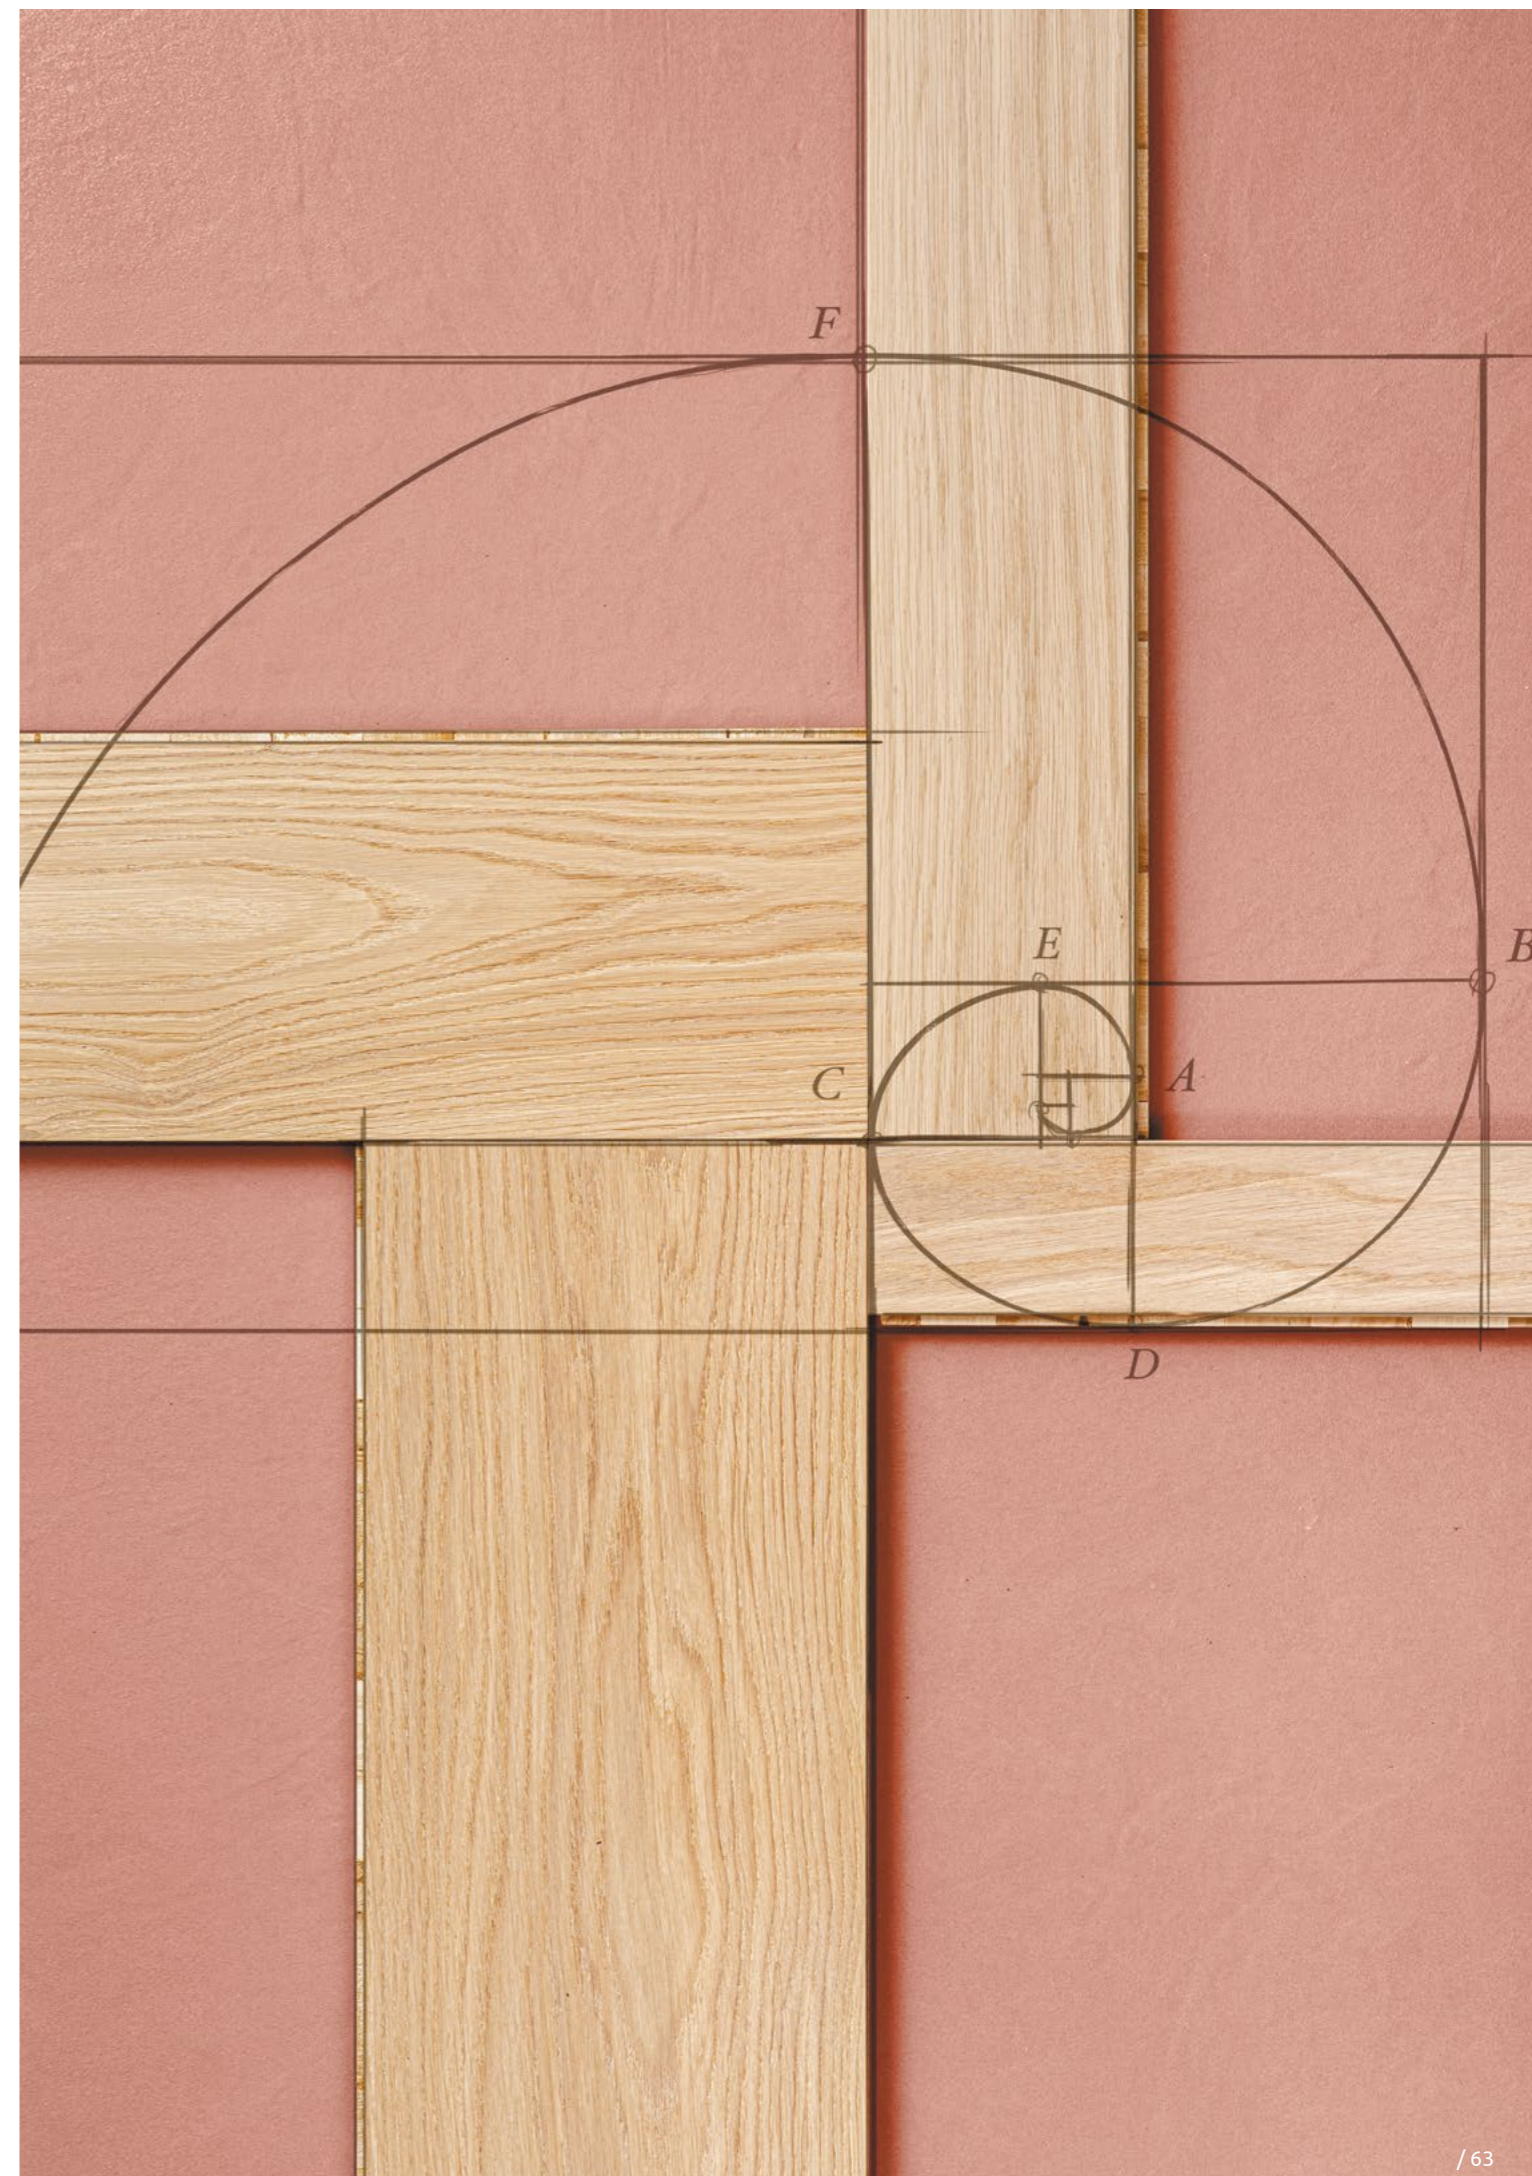

COSWICK WAX FILLER

Ready-to-use wax for quick remove of small damages, scratches and dents, that appear during the hardwood flooring lifetime exploitation. Wax filler is available in all Coswick colors.

COSWICK construction

3-LAYER T&G ENGINEERED FLOORING

- Finely balanced and symmetrical 3-layer construction retains its size in a wider range of environmental humidity.

All three layers are made of hardwood timber: top lamella from oak or american walnut, middle core from birch and base lamella from oak or birch. Using birch as a core instead of softer pine species increases the stability of the board as birch is far more resistant to deforming.

Top and base lamellas have the same thickness, which allows them to affect the core symmetrically in case of changes in the environment. This increases the balance of the construction and practically eliminates the possibility of twisting.

Usage of cork compensators in the core layer decreases straining in case of variations in the environmental humidity, providing additional stability.

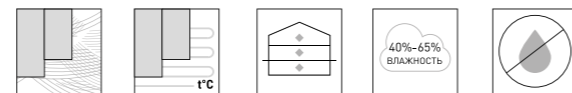

- Durable and secure traditional tongue & groove lock. Precise geometry and use of birch in the middle core layer ensures absence of chips and creases on the touching surfaces as well as eliminates creaking.
- Sawed lamella is used for the top layer, which

excludes any possibilities of internal cracking. Sawed lamella's texture is identical to the texture of a solid board.

- Extra-durable bonding of lamellas using special polyurethane hot-melt adhesive. It is extremely strong, moisture-resistant and highly elastic. There is no delaminating of the board at the seams even in case of flooding and no "ageing" effect: bonding qualities are retained over the entire life of the floorboards.
- Environmental safety: no formaldehyde emissions.
- Reliability and longevity of the construction is reaffirmed by a lifelong structural integrity guarantee.

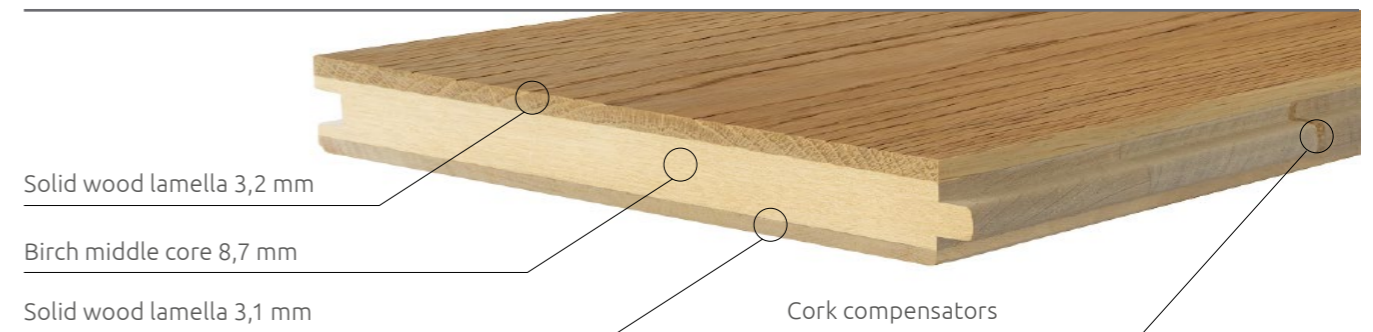

INSTALLATION

- 3-layer T&G engineered floorboard can be installed below, on or above ground level.
- Can be installed on heated floors.
- Installed through rigid positioning over concrete using adhesive or on wooden (plywood) base using nails.

COSWICK finishing systems

coswick silk finish

TECHNOLOGY

Coswick Silk Finish is an innovative deep penetrating UV-cured finish based on modified plant-oil acrylates applied in 4 layers.

Silk Finish easily penetrates surface pores of the wood and cures under UV-lights forming a durable film. The pores look half-open and accentuate the natural texture of the wood. The wood continues to breathe retaining a healthy micro-climate in the room.

FEATURES

Coswick Silk Finish is highly elastic and moisture and temperature fluctuation resistant, it protects the floorboards from dirt and scuffing. The "half-open" effect on the pores and the brushing technology conveys the relief, depth and natural texture of the boards. Silk Finish surface is just as warm and pleasant to the touch as natural, untreated wood.

Faint satin sheen and texture conceals marks, dents and scratches, facilitating maintenance.

ECOLOGY

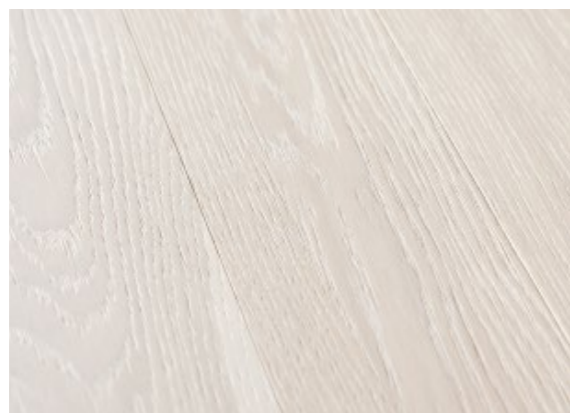

Environmentally friendly finish made from modified plant oils does not contain solvents or harmful compounds.

CARE & MAINTENANCE

The finish does not require complex maintenance, restores easily and renews during use which prolongs its service life almost indefinitely.

Regular maintenance includes dry and wet cleaning using Coswick care products for oiled floorboards. Parts affected by most stress can be easily restored with Coswick renovation oil for floors. The product is applied directly over the old layer without sanding. Afterwards the finish restores its original look and durability.

Depending on the wear, partial restoration of hardwood flooring in living spaces should be made 1-2 a year, full renewal is recommended every 3-5 years.

	SILK FINISH	SILK MAT FINISH	LACQUER FINISH
CLASS OF MATERIALS	UV-cured modified oil-acrylates	UV-cured modified oil-acrylates	Polyurethane-acrylates UV-curing
SURFACE TYPE	Semi-closed pores, wire brushed	Semi-closed pores, wire brushed	Closed pores
GLOSS LEVEL	Silk matte	Ultra matte	Semigloss or matte
WEAR-RESISTANCE	High	High	Very high
RESISTANCE TO CHEMICALS	High	High	Very high
CARE AND MAINTENANCE	Regular care, restorative care, finish renewal	Regular care, restorative care, finish renewal	Regular care
REPAIRABILITY	Medium	Medium	Low
RANGE OF USE	Residential and commercial	Residential and commercial	Residential and commercial
FINISH WARRANTY	-	-	25 years for residential, 35 years for residential (for commercial finish)

coswick lacquer finish

TECHNOLOGY

Lacquer finish is 12 coats of UV-cured lacquer with corundum micro-particles. This innovative technology creates a perfectly smooth surface with closed pores and provides for an extremely high wear-resistant finish.

FEATURES

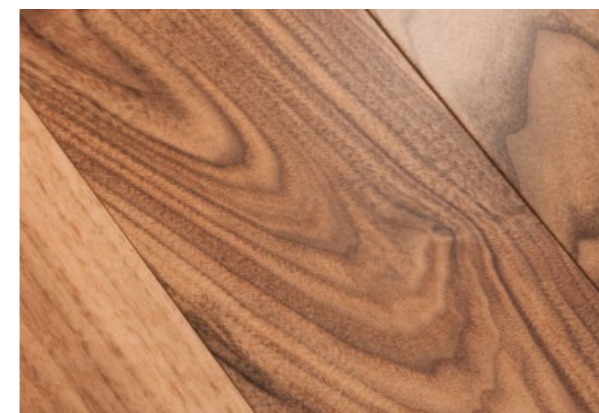

The key defining feature of Lacquer finish is its extreme durability. It is achieved through the use of special primers containing corundum micro-particles. These primers provide the finish with unique wear-resistance, which surpasses that of the traditional polyurethane varnishes tenfold. The upper coat of the lacquer is based on the cross-linked polymers, a new material created using nanotechnologies. It gives the finish a special wear-resistance to chafing while retaining high elasticity.

ECOLOGY

Eco-friendly finish without solvents or volatile compounds.

CARE & MAINTENANCE

Apart from regular care, lacquer finish does not entail any maintenance or restoration for many years.

LACQUER FINISH

grades COSWICK

SELECT & BETTER (S&B)

Slight colour variation and uniform wood texture. Minor areas with color tone variations of various natural shades are allowed. Minor swirls and veins of light-brown color are allowed. Thoroughly restored non-contrasting knots up to 10mm are allowed.

1 COMMON (1C)

Moderately contrasting color variation. Low-contrast sapwood, veins and swirls are allowed. Restored knots up to 25 mm and other minor defects. In dark colors the surface appears sufficiently uniform in tone and texture, knots and other inhomogeneities are practically invisible.

TAVERN (TAV)

Moderately contrasting color variation. Restored knots, sapwood, veins, swirls, curls, wormholes are allowed. Special coating technology highlights knots and other inhomogeneities, emphasizes the natural beauty, uniqueness and diversity of the oak grain texture.

1 NATUR (1N)

Moderate color variation. Low-contrast sapwood, veins and other minor defects are allowed. Restored knots up to 35 mm on parquet boards 190 mm and 240 mm wide and up to 60 mm on wide-format parquet boards 300 mm wide. In dark colors the surface appears sufficiently uniform in tone and texture, knots and other irregularities are practically invisible.

CHARACTER (CHAR)

Moderately contrasting color variation, sapwood, veins and grain. Knots of any size, restored, surface and end cracks, wormholes are allowed. Cracks and knots create an antique effect, emphasize the naturalness and solidity of oak hardwood flooring.

COSWICK installation

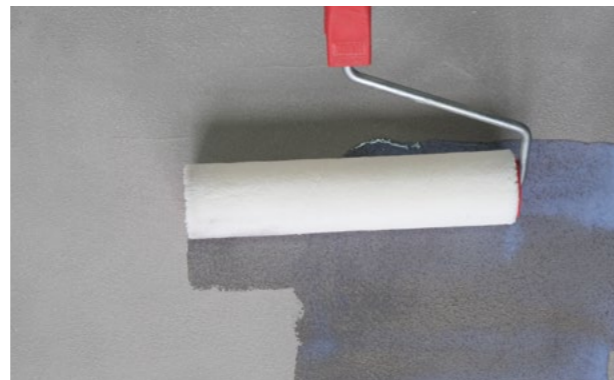

IMPORTANT!

Before starting the installation of Coswick engineered hardwood flooring, carefully read the information provided in this section.

Coswick hardwood floors are manufactured in accordance with the highest quality standards. Each plank undergoes a thorough and multi-stage quality inspection. However, the final inspection prior to installation is the responsibility of the installer and/or the owner. Make sure that the flooring matches the desired color, style, construction, and finish quality.

Wood is a natural material; therefore, some variations in color and texture are inevitable and are directly related to the natural characteristics of specific wood species.

When placing an order, always include at least 5% extra flooring to account for cutting and trimming beyond the actual square footage of the room.

INSTALLATION OF 3-LAYER HARDWOOD FLOORING:

- on concrete subfloor
- floating method

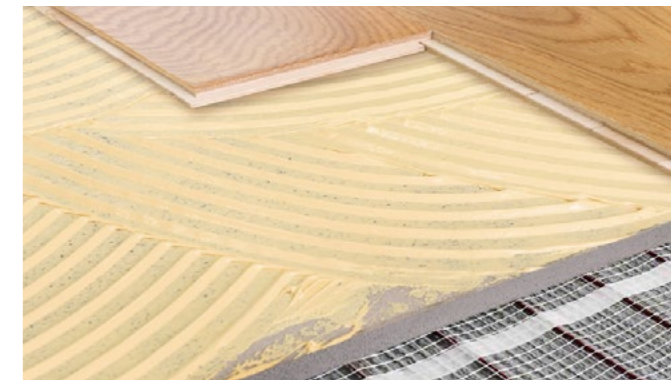

INSTALLATION OF 3-LAYER HARDWOOD FLOORING WITH CLICK-LOCK SYSTEM

INSTALLATION OF MOSAIC FLOORING

INSTALLATION OF CHEVRON T&G

INSTALLATION OF HERRINGBONE T&G

INSTALLATION ON HEATED SUBFLOOR
